The AdNovum group specializes in the development of highly secure software solutions for Swiss financial institutions, government agencies, and other organizations that manage highly sensitive data. AdNovum's engineers have implemented various large-scale applications and single sign-on solutions for such customers.

To ensure compliance with highest quality standards, our continuously growing subsidiary AdNovum Hungary Kft in Budapest is currently recruiting a

Software Quality Engineer

with excellent analytical, communication and organizational skills.

As our local software quality engineer at AdNovum Hungary Kft., you will assist the quality assurance team at our Zurich headquarters in establishing and implementing a consistent quality assurance strategy and measures throughout the AdNovum group of companies. Your main tasks will be:

- set up a consistent testing and quality assurance infrastructure at AdNovum Hungary Kft. for automated testing
- ensure consistent implementation of quality assurance measures (analysis of source code metrics, functional testing, integration testing, code-coverage analysis, load testing, profiling)
- integration of new components and technologies within existing application and service infrastructures

Requirements

For this multi-faceted task, we are looking for a software engineer with:

- a university degree in computer science or another technical subject
- knowledge and min. 2 years of experience in Java EE application development, distributed Unix environments (Sun/Linux), shell scripts, SQL databases, and Ant
- knowledge and min. 1 year of experience in the area of automated testing, possibly including knowledge of testing tools such as JUnit, HttpUnit and Selenium
- excellent English and possibly German language skills

We offer an attractive portfolio of challenging quality engineering and testing tasks and an inspiring working environment in Budapest. Start date: as soon as possible.

If you have substantial experience in software quality engineering and are interested in working for a dynamic software engineering company, please submit your written application in English to jobs@adnovum.hu or by mail to:

AdNovum Hungary Kft.
