Adnovum Brings Sixfold's AI-Powered Underwriting to Switzerland

Zurich, 16 June 2026 – Adnovum has entered into a partnership with Sixfold, a provider of AI solutions for underwriting in the insurance industry. With this step, Adnovum expands its offering for Swiss insurers with a solution that makes underwriting processes more efficient and can be integrated into existing system landscapes.

Sixfold's solution enables insurers to process incoming submissions in an automated manner by structuring data, assessing risk appetite, and generating recommendations based on existing underwriting guidelines. Typical use cases include the automated assessment of standard commercial risks, where large volumes of data need to be efficiently reviewed and processed. The aim is to relieve underwriters of administrative tasks and give them more time to focus on complex professional decisions.

AI support in day-to-day operations

Within the partnership, Adnovum will implement and integrate the solution for Swiss insurers, contributing its extensive experience in digitalizing regulated business processes and modernizing core systems in the insurance industry. «Many insurers are currently looking for concrete ways to integrate AI into their processes – not as a pilot project, but as a productive tool in day-to-day operations,» says Dr. Christian Straube, Head of Industry Insurance at Adnovum. «With Sixfold, we are expanding our offering with a solution that integrates into existing workflows and delivers clear value for underwriting.»

Growing presence in Europe

Through this partnership, Sixfold is expanding its presence in Europe. «Switzerland is an entry market with great potential for us,» says Roger Ferrandis, Head of Partnerships at Sixfold. «Adnovum combines deep insurance expertise with strong implementation capabilities. Together, we support insurers in modernizing their processes faster and more efficiently.»

Sixfold

Sixfold is a New York-based insurtech company that develops AI-powered solutions for underwriting in the insurance industry. Its platform helps insurers, MGAs, and reinsurers to process incoming submissions more efficiently, assess risks, and make informed underwriting decisions based on existing guidelines. The technology is used by insurers worldwide and processes a large volume of submissions every year across various insurance lines.

Adnovum

Adnovum is a leading Swiss provider of enterprise software and IT security solutions headquartered in Zurich. Thanks to its long-standing experience, reliable services, and a strong international partner network, Adnovum enables organizations and people to navigate the digital world safely. Whether public authorities, financial institutions, insurance, or logistics companies: Adnovum turns future-proof software into a driver of sustainable growth and bold innovation. By combining the targeted use of cloud and AI technologies with deep industry expertise, it delivers scalable enterprise and security solutions that meet the highest compliance requirements.
