

Cloud Readiness Workshop

Every company strives to move workloads into a cloud environment: for a safe, scalable, flexible, and future-oriented IT infrastructure that helps overcome business challenges.

But what needs to be clarified before even starting the cloud journey?

Overview

Based on a variety of tailored cloud solutions, the Cloud Readiness Workshop supports you in getting ready for the cloud journey, be it for one or for all applications in your portfolio. It ensures that all major steps are taken to prepare for the next decade of your enterprise IT environment. The full-day interactive workshop helps different stakeholders from IT, compliance, and business to understand the prerequisites for the upcoming journey.

Incorporation and usage

The workshop ensures that key insights and tools are not just understood but seamlessly incorporated into your company-specific context. You'll walk away with practical guidance for immediate application, as well as clear next steps to embed the results into daily operations. Our goal: sustainable value, not just a one-off session.

Your advantages

Kick-start your cloud journey with confidence: This one-day workshop gives you

- a tailored roadmap of key preparation steps,
- a clear summary of outstanding topics, and
- a comprehensive 80-point checklist – so you're fully equipped for every step that matters.

A ten-area framework for confident transformation

Cloud transformation isn't just a technical shift – it's a strategic journey. Our ten-area cloud readiness framework guides you through every essential phase, from defining your vision to ensuring operational excellence.

Each area focuses on a key aspect of preparation: from business alignment, compliance, and security to platform selection, governance, and skill development. You'll gain clarity, structure, and actionable steps to move forward with confidence – no matter where you are on your journey.

And your digital business works

Cloud Readiness Workshop

Our offering provides a structured, end-to-end service that sets the stage for a successful transition to the cloud.

We start with a targeted preparation phase, aligning objectives, priorities, and existing capabilities to your business context.

Together with your key stakeholders, we define the critical success factors and ensure that the right participants are involved. The interactive one-day workshop is tailored to your needs and covers the ten essential areas of cloud readiness. It creates clarity, shared understanding, and actionable outcomes.

After the session, you'll receive a structured summary, prioritized recommendations, and a large practical checklist to support the next steps. Our goal is not just to inform — but to empower you to move forward with confidence and clarity.

«Cloud Readiness Workshop – an end-to-end enablement for your cloud journey.»

Patrik Meier, Head of Cloud Solutions

Strategic clarity for executive decision-making

This one-day workshop provides the strategic insights and structure leaders need to make confident cloud decisions. Together with your key stakeholders, we assess your readiness across ten critical areas – from business alignment and compliance to skills and governance. The result: a clear, prioritized roadmap with actionable next steps, enabling informed investment and transformation planning.

Smart investment for tangible value

The Cloud Readiness Workshop is designed as a high-value, low-risk entry point to your transformation journey. With a fixed price of

CHF 3'200 (excl. VAT)

and clear outcomes, it delivers strategic clarity, stakeholder alignment, and actionable priorities all within one day. If you choose to move forward with a follow-up project within the next 90 days, the workshop fee will be fully credited. It's a focused investment that reduces uncertainty and accelerates time to impact.
